

CONTENTS OF VOLUME 104

Number 1, October 2003

R. Craigen. Boolean and ternary complementary pairs	1
Mitsugu Hirasaka and Paul-Hermann Zieschang. Sufficient conditions for a scheme to originate from a group	17
Diane Maclagan and Rekha R. Thomas. The toric Hilbert scheme of a rank two lattice is smooth and irreducible	29
Federico Ardila. The Catalan matroid	49
Joseph Bonin, Anna de Mier and Marc Noy. Lattice path matroids: enumerative aspects and Tutte polynomials	63
Eric Rivals and Sven Rahmann. Combinatorics of periods in strings	95
William B. Muse and K.T. Phelps. Orthogonal quadruple systems and 3-frames	115
Dongsu Kim and Seunghyun Seo. Transitive cycle factorizations and prime parking functions	125
John Shareshian. Topology of subgroup lattices of symmetric and alternat- ing groups	137
Art M. Duval and Dmitri Iourinski. Semidirect product constructions of directed strongly regular graphs	157
Jakob Jonsson. On the topology of simplicial complexes related to 3-connected and Hamiltonian graphs	169

Notes

Isabella Novik. Remarks on the Upper Bound Theorem	201
Noga Alon, Gérard Cohen, Michael Krivelevich, and Simon Litsyn. Gen- eralized hashing and parent-identifying codes	207

Number 2, November 2003

A.M. Garsia and N. Wallach. Qsym over Sym is free	217
Nathan Reading. The order dimension of the poset of regions in a hyper- plane arrangement	265
Jeremy L. Martin and Victor Reiner. Factorizations of some weighted spanning tree enumerators	287
Gregory S. Warrington. A formula for certain inverse Kazhdan–Lusztig polynomials in S_n	301
I.P. Goulden and Luis G. Serrano. Maintaining the spirit of the reflection principle when the boundary has arbitrary integer slope	317
Jianxing Yin. Constructions of difference covering arrays	327

Simeon Ball. The number of directions determined by a function over a finite field	341
Bruce N. Cooperstein and Antonio Pasini. The non-existence of ovoids in the dual polar space $DW(5, q)$	351
<i>Notes</i>	
Guillaume Gommard and Alain Plagne. $K_5(7, 3) \leq 100$	365
Hiroki Akazawa and Hiroshi Mizukawa. Orthogonal polynomials arising from the wreath products of a dihedral group with a symmetric group	371
<i>Author Index for Volume 104</i>	381
